2024

Tides:

Low Tide

Ebb Tide

High Tide

The Difference

Our risers serve different purposes for different settings.

We recommend our low tide for poolside use. Perfect for sitting with your favorite poolside drink in a lounge chair.

Riser Height	Total Table Height:
9"	25" (Lounge Chair Height)

Looking for a classic patio table to enjoy dinner with your family? Our Ebb Tide is what you're looking for!

Riser Height	Total Table Height:
15"	31" (Normal Table Height)

Lastly, our High Tide sits at bar height, and is perfect for cocktail hour with company and socializing with friends.

Riser Height	Total Table Height:
25"	41" (Bar Table Height)

Our umbrellas can be added to pools and hot tubs. In this case, we recommend finding how high you want your table above the water line and matching that to our riser options.

Got an existing receiver? We have models that can fit into an existing receiver.

Our umbrellas are made from anodized aluminum which means they are perfect for water and there's no corrosion!

School Spirit

Support your favorite school with our collegiate umbrellas!

We are now offering umbrellas with color combinations that support your favorite collegiate team!

Put your collegiate canvas up on game days and replace it with your everyday canvas color after the game.

Call for more color pairing options.

Table Size

We have 34 inch and 44 inch table sizes to suit your specific outdoor setting.

What makes us different?

Poly-Furniture

Each of our umbrellas are made from anodized aluminum which is what the typical t-top on a boat is made of.

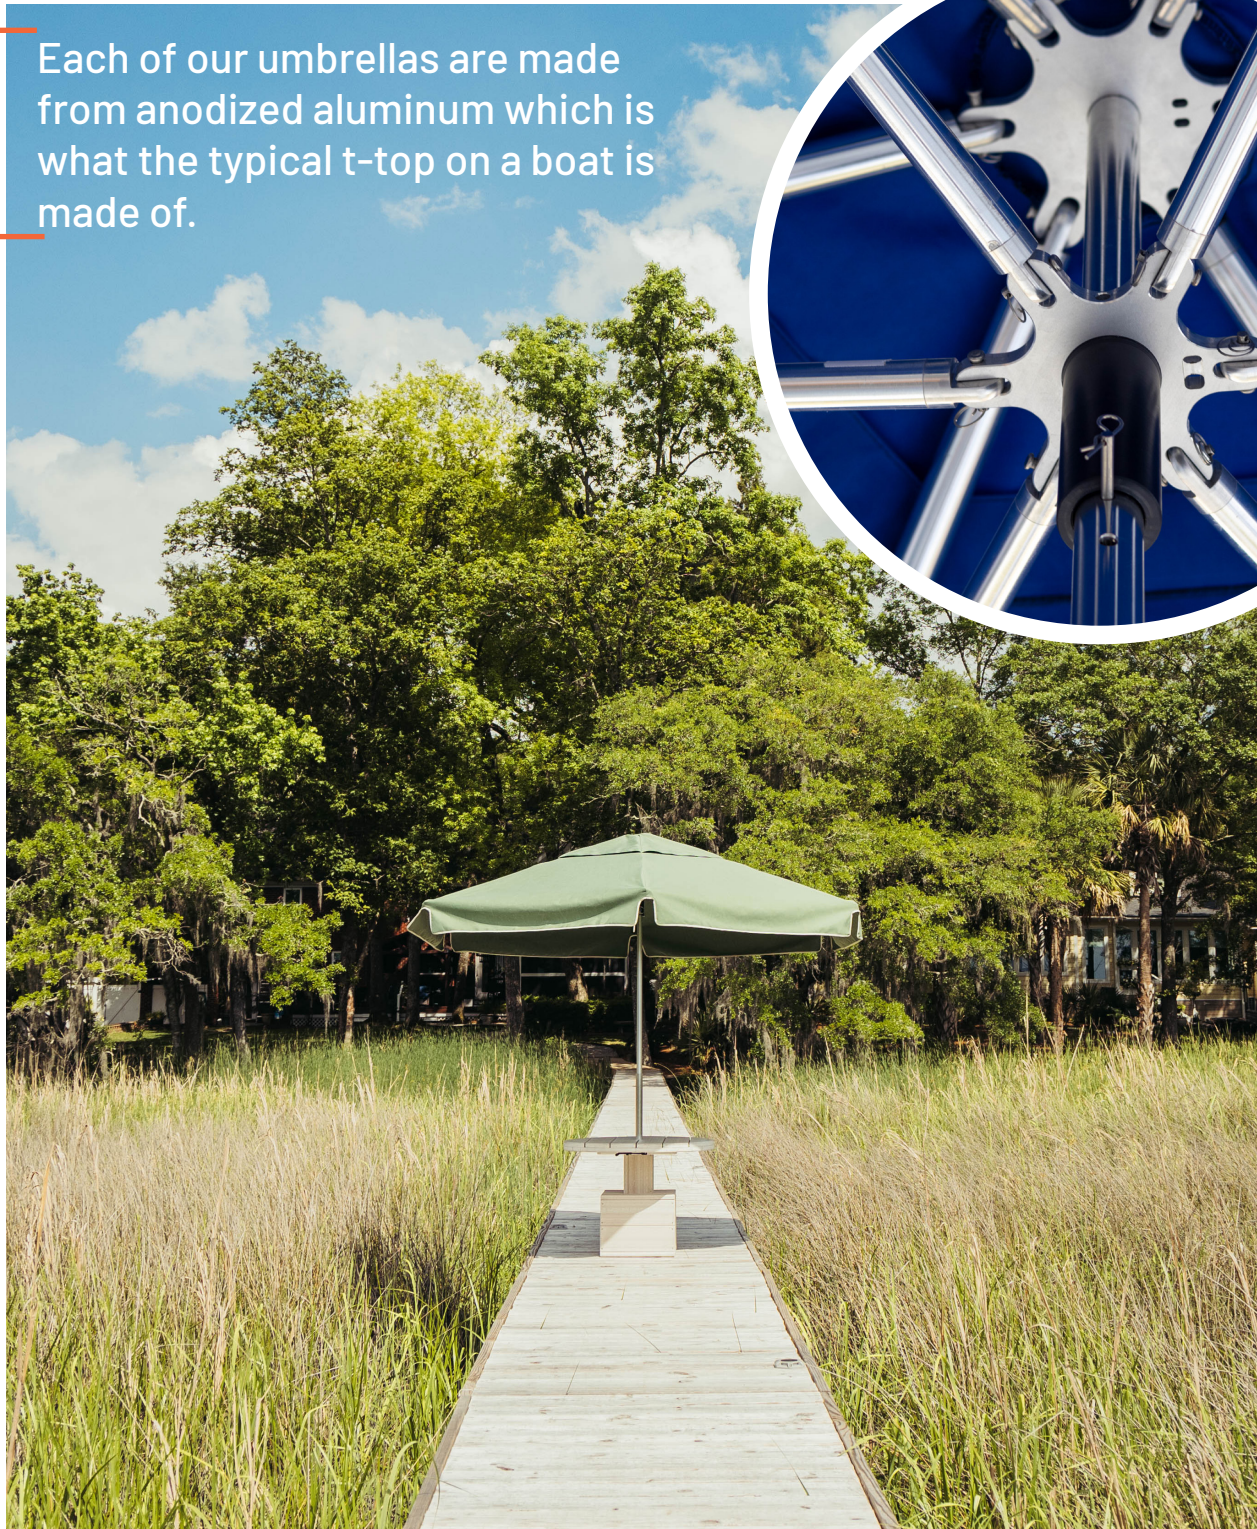

What makes poly-furniture unique? All poly-lumber components are designed and custom-made at our facility.

The poly-lumber material we source is all-weather material made from recycled plastics.

It is durable, low-maintenance, environmentally friendly, and comes in a variety of colors for you to choose from.

This material has beautiful striations and grain, while leaving behind the rotting and splintering that real wood would give you.

We call our creation a lifetime umbrella because of the simple fact that each piece of the umbrella is replaceable. With most patio umbrellas, once one piece breaks, you have to replace the entire umbrella, which is what inspired us to create this.

Why Sunbrella?

If you've bought a Sunbrella cover from us, you know the quality speaks for itself. We source all of our umbrella canvas from the best in the game, Sunbrella.

Stand out with their beautiful line of colors, and change your canvas for each of the seasons.

Sunbrella uses Color to the Core™ technology which means the fibers are saturated with color and UV-stabilized pigments before they're spun into yarn - meaning the pigment goes all the way through the fibers rather than sitting on the outside of the yarn.
